

Tanzeela Jabbar

Front-End Developer | React & Next.js

+923071343345 | tanzeela.dev@gmail.com | [linkedin.com/in/tanzeelajabbar/](https://www.linkedin.com/in/tanzeelajabbar/) | Karachi, Pakistan

Summary

Front-End Developer with hands-on experience in building modern, responsive web applications using React.js and Next.js. Skilled in optimizing performance, enhancing user experience, implementing authentication flows and integrating WebSockets for real-time features. Passionate about delivering scalable front-end solutions in dynamic team environments.

Skills

HTML, CSS3, JavaScript (ES6+), React.js, Next.js, Bootstrap, Tailwind CSS, Redux, Context API, React Query, GSAP, Axios, Fetch API, Git, Figma, WordPress, Laravel, Responsive Design, Web Performance Optimization, Cross-Browser Compatibility, RESTful API Integration, Framer motion, Google language translation, i18n language translation, Dual theme integration.

Work Experience

Tafsol Technologies

Frontend Intern

Karachi

June 2024 - Dec 2024

Junior Frontend Developer

Dec 2024 - Present

- Built reusable and optimized components using React and Next.js, improving codebase efficiency.
- Refactored legacy React code into modular Next.js components, resulting in a 30% reduction in code complexity.

APTECH Learning

IT Faculty

North Nazimabad, Karachi

May 2024 - June 2024

- Created and delivered lesson plans that improved student engagement and learning outcomes
- Conducted lab sessions that provided hands-on experience, increasing students' practical skills

Education

IQRA University

BS-CS

July 2020 - July 2024

- Achievements: CGPA: 3.84

Projects

Coach Huddle

- Implemented full CRUD functionality for FAQ categories, users, and other key modules using Next.js
- Developed a complete Admin Dashboard with protected routes, modular UI components, and intuitive user flows.
- Integrated WebSockets for real-time notifications, including user logins, activity alerts, and system updates.
- Used `getServerSideProps` and API routes in Next.js for secure and server-side data fetching.

Landlord Logic (Link: [Web](#) , [Authentication](#))

- Built a fully responsive online store with product listings, cart, and checkout flow.
- Integrated Redux for global state management to handle user cart, product filters, and auth states efficiently.
- Used `getStaticProps` and `getStaticPaths` for pre-rendering product pages.
- Ensured predictable state updates and seamless data flow across the app by following Redux best practices.

Impoself (Link: [Web](#))

- Implemented GSAP animations to enhance the website's visual appeal and interactivity
- Ensured a responsive and visually appealing UI that works seamlessly across devices.

Newvana (Link: [Web](#))

- Developed a Next.js application, creating an AI-powered platform for personalized reflections and emotional support, with modular components for mentor profiles, focus areas, and interactive FAQs to enhance user engagement.
- Integrated restful apis for user authentication, reflection saving, and real-time listening features, ensuring secure data handling and seamless cross-device accessibility.

Sansaino (Link: [Web](#))

- Built the talent marketplace platform using Next.js, featuring categorized expertise grids, step-by-step hiring processes, and interactive carousels for testimonials to facilitate global tech talent connections.
- Api integrations for job postings, proposal submissions, in-platform chat, and secure payment releases, enabling flexible hiring models (remote, hybrid, onsite) and milestone tracking for improved collaboration.
- Designed premium business plan interfaces with pricing cards, video embeds, and EOR compliance features, ensuring a responsive and animated user experience that supports verified freelancers and priority support functionalities.

Dine Albania (Link: [Web](#))

- Constructed a user-centric dining website from scratch using Next.js to promote Albanian dining experiences.
- Implemented dual theme support with seamless toggle functionality and multi-lingual internationalization.
- Integrated Google Maps for interactive location-based features.

Dental Source (Link: [Web](#))

- Developed a Next.js web application for dental order management, implementing a multi-step form wizard with progress indicators for scan uploads, patient info, and supplier assignments.
- Integrated file handling APIs with drag-and-drop uploads for formats like STL and OBJ, with real-time summaries and validation to streamline order creation and submission processes.
